

Exercise

Use simulator to test your domain

-  Checkout branch **start-step3**

- Start writing tests

```
var scrollHeight = element.scrollHeight + 0.02 * window.innerWidth;  
window.scroll(0, scrollHeight);  
}
```

```
var scrollHeight = element.scrollHeight + 0.02 * windowWidth;  
window.scroll(0, scrollHeight);  
}
```

Exercise

Use simulator to test your domain

- ➡ Checkout branch **start-step3**
- Start writing tests

```
var scrollHeight = element.clientHeight + 0.02 * window.innerWidth;  
window.scroll(0, scrollHeight);  
}
```

Solved problems

- ✓ External api changes
- ✓ Refactorability of the adapter
- ✓ No more technical tests
- ✓ Complexity isolation
- ✓ False assumptions
