

Roadbook Step3

Use simulators to test the domain with confidence

- Use the simulators
- Write a f....g test 😂
- Take time to appreciate:
 - domain language in tests
 - test brevity
 - fast feedback
 - confidence because we're utterly close to the production behaviour and interaction

Domain rules

The application can register bets

- registering a bet is done by providing
 - gambler name
 - the 3 numbers of snails on the podium

The application lists the winners according to last race ran.

To win a bet :

- The podium match exactly the race result
- The bet has been registered at least 3 seconds before the race timestamp
- A bet is valid only for the next race
